

Enhanced Provision - Alternative Curriculum Provision Map

Intent:

For a very small number of children, our mainstream curriculum is not appropriate due to the nature of their special educational needs. We have therefore designed a curriculum for these children that is tailored to their individual needs. This alternative curriculum is designed around promoting communication and interaction strategies; developing independence skills, emotional understanding social skills and meeting sensory needs. As with our mainstream curriculum intent, we aim to develop every child as an individual and strive for excellence for all.

Promoting communication and interaction strategies

Register time
Choosing time
Snack time
